NE24 3AG

Hi All,

We are pleased to announce that we have recently installed a new, interactive "SMART" presentation board & projector in our G01 conference room.

Interactive whiteboards allow many different forms of media to be displayed including presentations & video's, offering users the opportunity to share & participate in a more immersive presentation experience.

The interactivity allows users to touch, write & draw on the board, allowing for greater emphasis & immediate feedback on the subject at hand. The board allows easy access to the internet & the enormous variety of resources the web offers, through the fast, free Wi-Fi provided at the centre.

We also have a laptop available to use with the system. Alternatively you can bring your own laptop to use for your presentation.

Should you require more information and/or would like to view a demonstration of the "SMART" board in action. Contact:

Telephone: 01670 542 840

Fax Phone: 01670 542 881
